

Possible #1 for 2050

Metropolization and agrobusiness

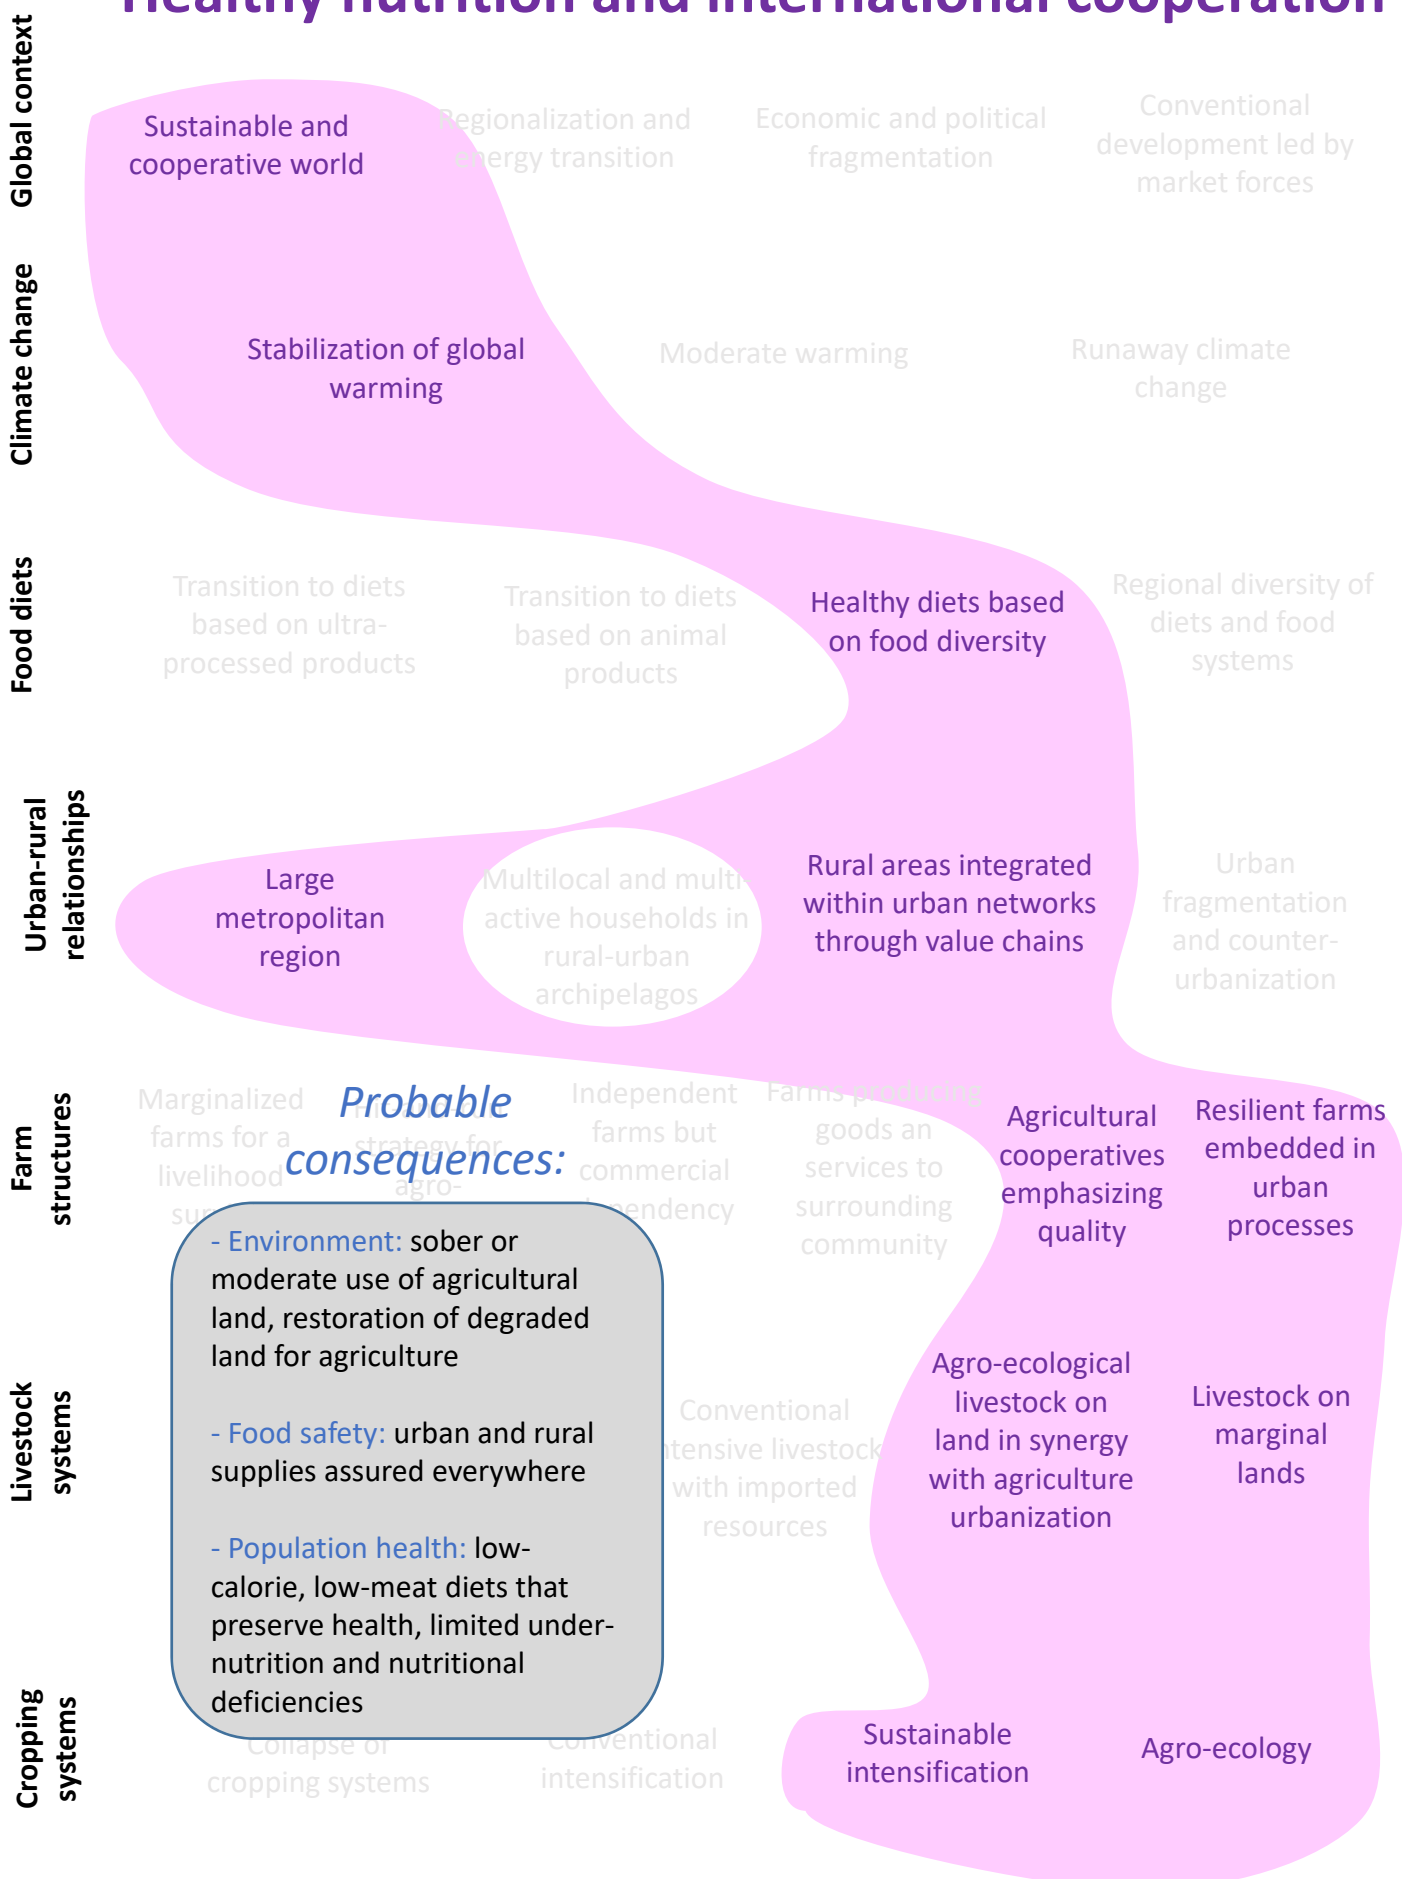

Possible #2 for 2050

Regionalized food systems

Possible #3 for 2050

Healthy nutrition and international cooperation

Probable consequences:

- **Environment:** sober or moderate use of agricultural land, restoration of degraded land for agriculture
- **Food safety:** urban and rural supplies assured everywhere
- **Population health:** low-calorie, low-meat diets that preserve health, limited under-nutrition and nutritional deficiencies

Possible #4 for 2050

Rural communities in a fragmented world
